

# ActivityPub Apps

| App Instances                 | App Website | Source Code | Description  |
|-------------------------------|-------------|-------------|--|
| <a href="#">AndStatus</a>     |             |             | ActivityPub C2S Client for Android that not only has basic implementation of the ActivityPub Client-to-Server spec, but which has internal data model close to the ActivityPub/ActivityStreams data model.                             |
| <a href="#">Anfora</a>        |             |             | A decentralized image sharing platform   |
| <a href="#">Bonfire</a>       |             |             | A generic ActivityPub federated server.  |
| <a href="#">Discourse</a>     |             |             | Discussion on Federation support for Discourse.  |
| <a href="#">Funkwhale</a>     |             |             | A social platform to enjoy and share music   |
| <a href="#">Gancio</a>        |             |             | A shared agenda for local communities with AP support.   |
| <a href="#">Go-Fed</a>        |             |             | Discussion about the suite of Golang ActivityPub libraries and tools.  |
| <a href="#">Hash2Pub</a>      |             |             | a fully-decentralised relay for global hashtag federation  |
| <a href="#">kepi</a>          |             |             | ActivityPub daemon in Django   |
| <a href="#">Lemmy</a>         |             |             | Lemmy is a link aggregator / reddit alternative, intended to work in the fediverse.  |
| <a href="#">Mastodon</a>      |             |             | Social networking, back in your hands  |
| <a href="#">Mobilizon</a>     |             |             | Together, we go further.   |
| <a href="#">Olki</a>          |             |             | Self-hosted science: corpora, peer reviews, alerts, all in one simple gateway to the fediverse for a science that is more open to the public.  |
| <a href="#">openEngiadina</a> |             |             | Create, share and use open local knowledge.  |
| <a href="#">PeerTube</a>      |             |             | Take back control of your videos   |
| <a href="#">Pherephone</a>    |             |             | An activityPub server that reblogs all the statuses of certain actors.   |
| <a href="#">Pixelfed</a>      |             |             | Photo sharing. For everyone.   |
| <a href="#">Pleroma</a>       |             |             | Pleroma is a free, federated social networking server built on open protocols (ActivityPub and OStatus). It's resource usage is lightweight (can run on a Raspberry Pi) and is easy to deploy (only requires PostgreSQL for releases). |

| App Instances               | App Website   | Source Code   | Description  |
|-----------------------------|---|---|--|
| <a href="#">Plume</a>       | <a href="https://joinplu.me/">https://joinplu.me/</a>                 | <a href="https://github.com/Plume-org/Plume">https://github.com/Plume-org/Plume</a>                     | A federated blogging application.  |
