AppImage

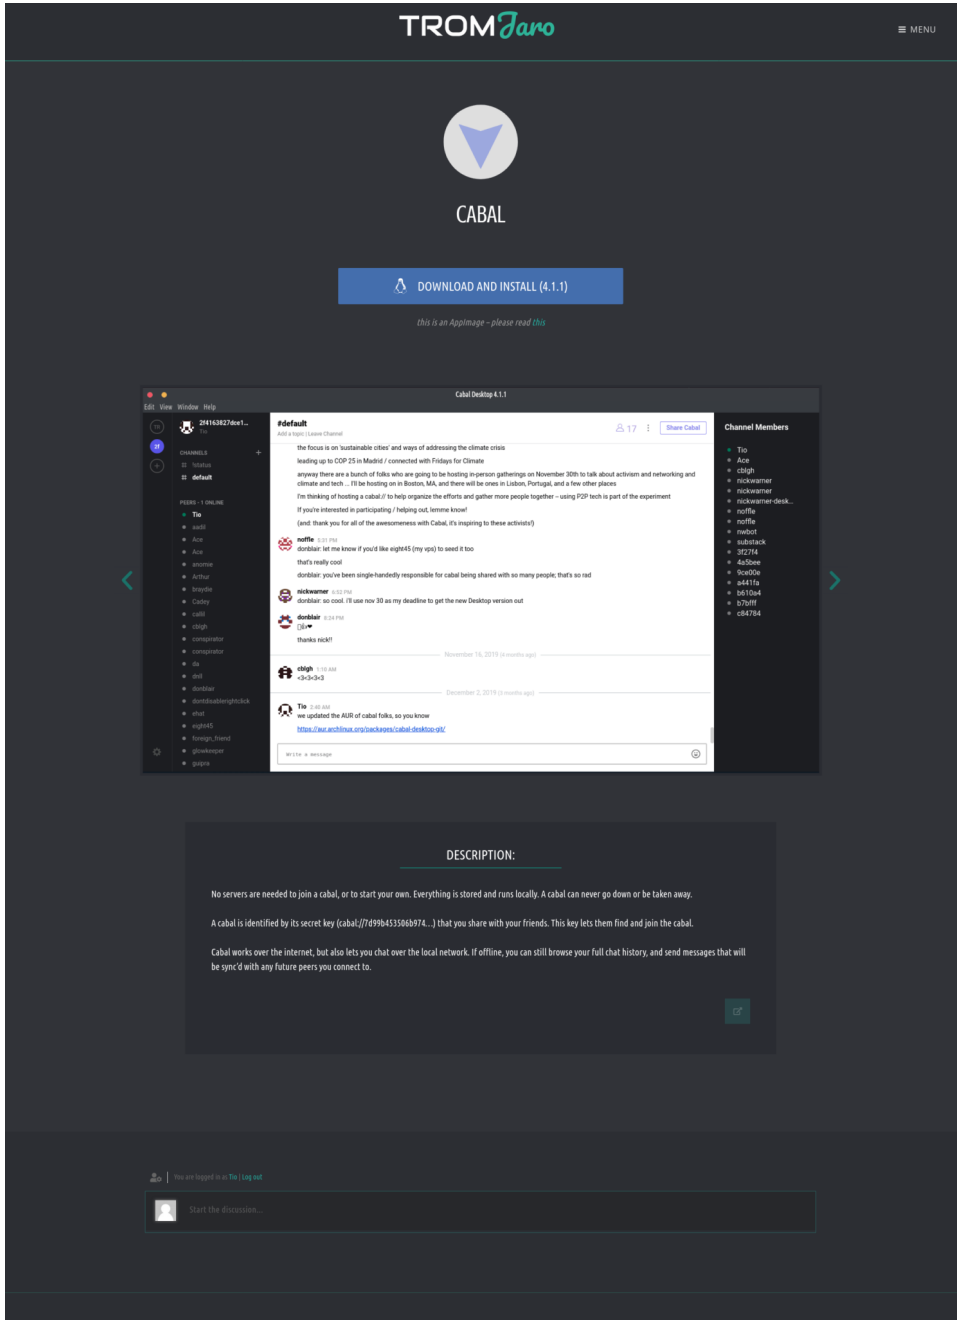

Linux apps that run anywhere

AppImageHub - Here are 977 apps that you can run on Linux without installation. And counting

https://www.appimagehub.com/ - This catalog has 653 AppImages and counting. AppImages are self-contained apps which can simply be downloaded & run on any Linux distribution. For easy integration, download AppImageLauncher.

NX Software Center - A portable Software Center for portable applications thanks to AppImage.

Pling-Store - Installer and Content Management App for OCS-compatible websites like pling.com, gnome-look.org, appimagehub.com, etc. It allows to download, install and apply desktop themes, icon themes, wallpapers, or mouse cursors directly under various desktop environments using the “Install”-button. CABAL
DOWNLOAD AND INSTALL (4.1.1)
this is an Appimage - please read this
Cabal Desktop 4.1.1
#default
Share Cabal
Channel Members
DESCRIPTION:
No servers are needed to join a cabal, or to start your own. Everything is stored and runs locally. A cabal can never go down or be taken away.
A cabal is identified by its secret key (cabal://7d99b453506b974...) that you share with your friends. This key lets them find and join the cabal.
Cabal works over the internet, but also lets you chat over the local network. If offline, you can still browse your full chat history, and send messages that will be sync'd with any future peers you connect to.
