

ApplImage

Linux apps that run anywhere

[ApplImageHub](#) - Here are 977 apps that you can run on Linux without installation. And counting

<https://www.appimagehub.com/> - This catalog has 653 ApplImages and counting. ApplImages are self-contained apps which can simply be downloaded & run on any Linux distribution. For easy integration, download [ApplImageLauncher](#).

[NX Software Center](#) - A portable Software Center for portable applications thanks to ApplImage.

[Pling-Store](#) - Installer and Content Management App for OCS-compatible websites like pling.com, gnome-look.org, appimagehub.com, etc. It allows to download, install and apply desktop themes, icon themes, wallpapers, or mouse cursors directly under various desktop environments using the "Install"-button. ¹⁾

Add a topic (Leave Channel)

the focus is on 'sustainable cities' and ways of addressing the climate crisis

leading up to COP 25 in Madrid / connected with Fridays for Climate

anyway there are a bunch of folks who are going to be hosting in-person gatherings on November 30th to talk about activism and networking and climate and tech ... I'll be hosting on in Boston, MA, and there will be ones in Lisbon, Portugal, and a few other places

The thinking of hosting a cabal / to help organize the efforts and gather more people together -- using P2P tech is part of the experiment

If you're interested in participating / helping out, please know

(and thank you for all of the awareness with Cabal, it's inspiring to these activists)

dondar: let me know if you'd like ngnicks (my sp) to send it too

that's really cool

dondar: you've been single-handedly responsible for cabal being shared with so many people, that's so rad

nickwamer

dondar: no prob. I'll use now 30 as my deadline to get the new Desktop versions out

dondar

0:24 PM

thanks nick!

DESCRIPTION:

No servers are needed to join a cabal, or to start your own. Everything is stored and runs locally. A cabal can never go down or be taken away.

A cabal is identified by its secret key (cabal://d99b45350ab974...) that you share with your friends. This key lets them find and join the cabal.

Cabal works over the internet, but also lets you chat over the local network. If offline, you can still browse your full chat history, and send messages that will be sync'd with any future peers you connect to.
