This is no longer actively developed ☹️

[300\)](#)

Upstream archived

[301\)](#)

This project no longer has any active development

[302\)](#)

Fails with CMake Error: The source directory does not appear to contain CMakeLists.txt. This probably won't be fixed for a long time.

[303\)](#)

Upstream hasn't been active in years, even in issues. :(

[304\)](#)

There are a LOT of bugs, many that haven't recieved attention in years. They are inactive enough to let their SSL cert expire too.. I'm not comfortable adding an email client with such lax development around it. It feels like too much potential for things to go wrong.
