Zero Install

A decentralised cross-platform software installation system

Feeds can be hosted on any normal website.

0mirror provides a list of all currently known feeds.

Tools

Zero Install Publishing Tools helps you create and update Zero Install feeds
0compile create a binary release from source code
0publish utility to make creating injector interfaces easier
0publish-gui GTK editor for Zero Install feeds
0release manage new releases with Zero Install
FeedLint check your Zero Install feeds

Make-headers creates -dev packages
0test test Zero Install programs
0export create self-installing bundles for distribution on CD
0install decentralised installation system
0repo manage a repository of 0install feeds
0watch scans websites for new releases and triggers 0template if required

GUI Apps

- GUI apps are applications with a graphical user interface. You can use the "Integrate" button to create shortcuts for feeds.

Utilities

- A selection of software utilities

Development

- You can use Zero Install to quickly get common development tools.

Docker

- Docker is a popular container technology. You can use Zero Install access various Docker-related tools.

Kubernetes

- Kubernetes is a container orchestration system. You can use Zero Install access various Kubernetes-related tools.

Python

- Python is an interpreted, interactive, object-oriented programming language. You can use Zero Install to: Get Python itself; Run apps that need Python and Python libraries as dependencies

PowerShell

- PowerShell is an interactive shell and a scripting language. You can use Zero Install to: Get PowerShell itself; Run scripts that need PowerShell as a dependency

Perl

- Install Perl4-CoreLibs, libraries historically supplied with Perl 4

Ruby

- Ruby is a dynamic, open source programming language. You can use Zero Install to: Get Ruby development tools; Run apps that need Ruby as a dependency

JavaScript

- JavaScript is an interpreted language. You can use Zero Install to: Get JavaScript development tools; Run apps that need JavaScript runtime (e.g. Node.js or Electron) as a dependency

OCaml

- Install OCaml runtime, ML language implementation with a class-based object system

Go

- Install Go, the tool for managing Go source code

Java

- Java is programming language and runtime environment. You can use Zero Install to: Get Java development tools and SDKs; Run apps that need Java as a dependency

.NET

- .NET is a software framework and runtime developed by Microsoft. You can use Zero Install to: Get .NET development tools and SDKs; Run apps

that need .NET as a dependency

Libraries

- You can reference these libraries from other feeds as dependencies.
