- [Visual Studio Code](#) (2026/02/03 11:53)
  Code editing. Redefined.**NOTE: This is the proprietary Microsoft build of Visual Studio Code, packaged into a Flatpak. This repackaging is not supported by Microsoft.** Visual Studio Code is a new choice of tool that combines the simplicity of a code editor with what developers need for the core edit-build-debug cycle. IMPORTANT: To use certain features in this flatpacked version (like the integrated terminal), please read the linked documentation. Additional information:Developer: Microsoft CorporationLicense: LicenseRef-proprietary=https://code.visualstudio.com/licenseVersion: 1.108.1

- [IntelliJ IDEA Open](#) (2026/02/03 11:31)
  Leading Java and Kotlin editor**This is a community package of IntelliJ IDEA and not officially supported by JetBrains s.r.o.** IntelliJ IDEA Open Edition is a free IDE built on open-source code that provides essential features for Java and Kotlin enthusiasts. IntelliJ IDEA is an Integrated Development Environment (IDE) for professional development in Java and Kotlin. It is designed to maximize developer productivity and has a strong focus on privacy and security. It does the routine and repetitive tasks for you by providing clever code completion, static code analysis, and refactorings. It lets you focus on the bright side of software development, making it not only productive but also an enjoyable experience. The development of modern applications involves using multiple languages, tools, frameworks, and technologies. IntelliJ IDEA is designed as an

IDE for JVM languages, but numerous plugins can extend it to provide a polyglot experience. Use IntelliJ IDEA to develop applications in the following languages that can be compiled into the JVM bytecode, namely: Java, Kotlin, Scala and Groovy BETA branch enable Wayland Preview Support Additional information:Developer: JetBrains s.r.o.License: Apache-2.0Version: 2025.3.2

- **SyncThingy** (2026/02/03 10:49)
SyncThingy = Syncthing + simple tray indicatorSyncThingy is a simple tray indicator for Syncthing written in C++. Following the KISS principle, it allows you to see if Syncthing is running, stop it and manage it using the default webui. Additional information:Developer: zocker_160License: GPL-3.0Version: 0.8.1

- **Rclone UI** (2026/02/03 10:09)
The GUI for rclone. The best way to manage your rclone remotes & tasks in a light and easy way. Free to use & open source. Stop remembering flags, copy pasting commands, and wasting time. Features: ☐ Cross platform running on Windows, Linux, macOS (x64, Arm and Apple Silicon) ☐ Works with your existing rclone installation (or can install rclone for you) ☐ File Browser 2.0 ☐ Proxy support ☐ Sync, Download, Copy, Mount, Serve, Move, and more ☐ Transfers (see all background operations) ☐ Set default flags for each remote separately, based on the operation (mount, copy, etc) ☐ Customize the flags when running an operation on a case by case basis (on top of defaults) ☐ Set a password for the Settings panel ☐ Hide commands or remotes from the tray menu ☐ Import/Export Configs (encrypted with pass or command) No tracking, no ads. Do more with Rclone! Additional information:Developer: Rclone UILicense: Apache-2.0Version: 3.3.0

- **Ente Photos** (2026/02/03 10:07)
Safe home for your photos Ente is an open-source, end-to-end encrypted (E2EE) photo storage app, that provides a secure way to backup your photos. Additional information:Developer: Ente.io DevelopersLicense: AGPL-3.0Version: 1.7

- **Postman** (2026/02/03 09:48)
Platform for building and using APIs**NOTE: This wrapper is not verified by, affiliated with, or supported by Postman Inc.** Postman is the complete toolchain for API developers, used by 5 million developers and more than 100,000 companies worldwide to access 130 million APIs every month. Postman makes working with APIs faster and easier by supporting developers at every stage of their workflow, and is available for macOS, Windows, Linux and Chrome users. Additional information:Developer: Postman Inc.License: LicenseRef-proprietaryVersion: 11.83.1

- **Unity Hub** (2026/02/03 09:32)
Manage game engine installations**NOTE: This wrapper is not verified by, affiliated with, or supported by Unity Technologies.** Unity is used to create half of the world's games. Unity's real time platform, powered by tools and services, offers incredible possibilities for game developers, and creators across industries and applications. Use the Unity Hub to manage multiple installations of the Unity Editor, create new projects, and access your work. Additional information:Developer: Unity TechnologiesLicense: LicenseRef-proprietaryVersion: 3.12.1

- **Thincast Remote Desktop Client** (2026/02/03 09:26)
A free RDP (Remote Desktop Protocol) Client for Linux, macOS and Windows Thincast Client allows you to connect to virtual applications and desktops over the RDP (Remote Desktop Protocol). It offers features like built-in support for redirecting webcams, configuring remote apps, regular security updates and hardware-accelerated video decoding to extend the battery life of your device, ideal when working on the go. Using the Remote Desktop (RD) WebAccess Client you gain easy access to and control of published virtual machines (with Thincast Workstation), desktop sessions and applications. Initial support for 64-bit ARM based devices (aarch64 only) like Raspberry Pi has been added with V. 1.0.184.

As of today, we are the main contributor to the FreeRDP project. Additional information:Developer: Thincast Technologies GmbHLicense: LicenseRef-proprietary=https://thincast.com/licenses/rdc/license.htmlVersion: 1.1.687

- **ImageFan Reloaded** (2026/02/03 09:25)
Feature-rich, tab-based image viewer, supporting multi-core processingImageFan Reloaded is a fast and easy-to-use image viewer with broad format support for everyday photo browsing and management. Features: quick concurrent thumbnail generation, scaling to the number of processor cores present support for multiple folder tabs keyboard and mouse user interaction dark and light modes, based on system settings 44 supported image formats: bmp, cr2, cur, dds, dng, exr, fts, gif, hdr, heic, heif, ico, jfif, jp2, jpe/jpeg/jpg, jps, mng, nef, nrw, orf, pam, pbm, pcd, pcx, pef, pes, pfm, pgm, picon, pict, png, ppm, psd, qoi, raf, rw2, sgi, svg, tga, tif/tiff, wbmp, webp, xbm, xpm fast and seamless full-screen and windowed navigation across images image editing capabilities, with undo support: rotate, flip, effects, save in various formats, crop and downsize image animation support for the formats gif, mng and webp folder and image file ordering by name, last modification time and random shuffle, ascending and descending configurable thumbnail size, between 100 and 1200 pixels thumbnail caching capability for fast folder browsing slideshow navigation across images image info containing file, image, color, EXIF, IPTC and XMP profiles automatic image orientation according to the EXIF orientation tag toggle-able recursive folder browsing targeted zooming in, and moving over the zoomed image Additional information:Developer: Mihnea RădulescuLicense: GPL-3.0-or-laterVersion: 1.2026.02.03

- **NymVPN** (2026/02/03 08:54)
Decentralized, mixnet, and zero-knowledge VPNDesktop application for NymVPN. NymVPN is a decentralized, mixnet and zero-knowledge VPN. Features: 5-hop Anonymous mode (using the Nym Mixnet) 2-hop Fast mode (using WireGuard) No centralized logs Hide your public IP Entry and exit hop location NOTE: This package only provides the client application. For the VPN to work, the daemon aka nym-vpnd, must be installed and running. You can install it from these separate packages: deb package (requires to setup the Nym deb repository): nym-vpnd AUR packages: nym-vpnd and nym-vpnd-bin For more details, please check https://nym.com/en/download/linux Alternatively you can get the binary directly from the GitHub releases: Go to https://github.com/nymtech/nym-vpn-client/releases Find the latest release with tag nym-vpn-core-v1.2.3 Download the linux archive nym-vpn-core-v1.2.3_linux_x86_64.tar.gz and extract the binary (make it executable) From a terminal, run sudo nym-vpnd NOTE: The daemon requires root privileges to work. Additional information:Developer: NymLicense: GPL-3.0-onlyVersion: 1.23.0

- **Azure Storage Explorer** (2026/02/03 08:52)
Graphical tool to manage Azure cloud storage resources**NOTE: This wrapper is not verified by, affiliated with, or supported by Microsoft.** Upload, download, and manage Azure blobs, files, queues, and tables, as well as Azure Cosmos DB and Azure Data Lake Storage entities. Easily access virtual machine disks, and work with either Azure Resource Manager or classic storage accounts. Manage and configure cross-origin resource sharing rules. Additional information:Developer: Microsoft CorporationLicense: LicenseRef-proprietary=https://github.com/microsoft/AzureStorageExplorer/blob/main/LICENSE/Version: v1.41.0

- **Vintage Story** (2026/02/03 08:22)
Wilderness survival sandbox gameTo play this game, you must purchase an account at https://www.vintagestory.at/. Vintage Story is an uncompromising wilderness survival sandbox game inspired by lovecraftian horror themes. Find yourself in a ruined world reclaimed by nature and permeated by unnerving temporal disturbances. Relive the advent of human civilization, or take your own path. - **RemNote** (2026/02/03 08:20)
  Make flashcards in your notes**Note: This is a community package of RemNote. It is not verified by, affiliated with, or supported by RemNote Inc.** RemNote is an all-in-one learning tool that combines note-taking, knowledge management, flashcards, and spaced repetition to enable effective and efficient learning. Key features: Notes, Docs & Outlines: Capture and link ideas for long-term knowledge management Smart Flashcards: Create flashcards directly from your notes Spaced Repetition: Build long-term memory with proven study intervals Linked References: Review all notes connected to a topic with contextual links PDF Annotation: Highlight, annotate, and create flashcards from documents Multimedia Embedding: Incorporate videos, documents, and more into notes Tags: Organize notes, to-dos, and multimedia materials LaTeX Formulas: Create and edit mathematical formulas inline Templates: Automate repetitive note-taking tasks Code Blocks: Keep programming notes separate from code Import & Sync: Bring data from any note-taking app Offline Mode: Work without internet connection Perfect for students, researchers, and lifelong learners who want to build lasting knowledge while cutting study time in half. Additional information:Developer: RemNote Inc.License: LicenseRef-proprietary=https://www.remnote.com/terms_of_serviceVersion: 1.22.77

- **Tsukimi** (2026/02/03 08:15)
  A simple third-party Emby clientTsukimi is a simple third-party Emby client written in GTK4-RS, uses MPV as the video player, and GStreamer as the music player. Additional information:Developer: InahaLicense: GPL-3.0-or-laterVersion: 0.21.0

- **Lights Off** (2026/02/03 07:58)
  Turn off all the lights Lights Off is a collection of light switch puzzles. Clicking on a light toggles it either on or off, but also toggles all the surrounding lights, too. Your objective is simple: turn off all the lights! Players who delight in turning off lights will enjoy the huge number of levels. Additional information:Developer: The Lightsoff TeamLicense: GPL-3.0+Version: 48.1

- **AudioTube** (2026/02/03 07:25)
  YouTube Music appAudioTube can search YouTube Music, list albums and artists, play automatically generated playlists, albums and allows to put your own playlist together. It is adapted to mobile phones and desktop computers. Additional information:Developer: KDELicense: GPL-2.0+Version: 25.12.1

- **Alpaca** (2026/02/03 06:11)
  Chat with AI modelsA private AI client Features Talk to multiple models in the same conversation Pull and delete models from the app Have multiple conversations Image recognition (Only available with compatible models) Plain text documents recognition Import and export chats Append YouTube transcripts to the prompt Append text from a website to the prompt PDF recognition Disclaimer This project is not affiliated at all with Ollama, I'm not responsible for any damages to your device or software caused by running code given by any models. Additional information:Developer: Jeffry Samuel Eduarte RojasLicense: GPL-3.0-or-laterVersion: 9.0.2

- **Karere** (2026/02/03 05:54)
  Chat on WhatsApp Karere brings WhatsApp to your Linux desktop with a native look and feel. It integrates seamlessly with your environment, offering a clean, modern interface that respects your system's theme and workflow. By wrapping WhatsApp Web, it ensures you have access to all the latest features while adding powerful desktop-specific capabilities. Key features include: Native system notifications and tray icon support Persistent login sessions so you don't need to scan the QR code every time Privacy controls and comprehensive spell-checking settings Smooth performance with hardware acceleration Proper clipboard integration for text and images Additional information:Developer: Thiago

FernandesLicense: GPL-3.0-or-laterVersion: 2.3.5
- [QOwnNotes](#) (2026/02/03 05:51)
Markdown note-takingQOwnNotes is the open source (GPL) plain-text file notepad with Markdown support and todo list manager for GNU/Linux, Mac OS X and Windows by Patrizio Bekerle, that (optionally) works together with the notes application of ownCloud or Nextcloud. Additional information:Developer: Patrizio BekerleLicense: GPL-2.0+Version: 26.2.0
- [Dotfiles Installer](#) (2026/02/03 05:45)
Manage dotfiles fast and secureTake control of your dotfiles for different desktop configurations with Dotfiles Installer, designed to make dotfile management seamless. You can install dotfiles easily, quickly, and securely with an intuitive installation wizard that guides you through every step. The app prioritizes your data safety, offering robust backup functionality and protection for your existing customizations during the installation process. Furthermore, the app allows you to publish your own dotfiles and offer others a straightforward, intuitive way to install your preferred setup. Additional information:Developer: Stephan Raabe (ML4W)License: GPL-3.0-or-laterVersion: 0.12.0
- [RSS Guard](#) (2026/02/03 04:37)
Simple, yet powerful news feed reader RSS Guard is a news feed reader, written in C++ and Qt. It supports many feed formats, such as: ATOM JSON (1.x) RSS (0.x, 1.x, 2.x) It also supports many web-based feed services, including: Feedly Gmail Google Reader API (Bazqux, FreshRSS, Inoreader, Miniflux, Reedah, The Old Reader, etc.) Next Cloud News Tiny Tiny RSS Note for Flatpak users: The autostart feature can only work if you manually allow us access to the ~/.config/autostart directory. You can easily do that with the following command: flatpak override --user --filesystem=xdg-config/autostart io.github.martinrotter.rssguard Additional information:Developer: Martin RotterLicense: GPL-3.0Version: 4.8.6
- [Discord](#) (2026/02/03 04:26)
Talk, play, hang outDiscord is a free all in one messaging, voice, and video client thats available on your computer and phone. Whether you're part of a school club, gaming group, worldwide art community, or just a handful of friends that want to spend time together, Discord makes it easy to talk every day and hang out more often. Talk to your friends with messaging, voice, and video in a "Direct Message" (1 other person), group chat (up to 10 people), or a multi-channel server (practically infinite maximum members). Discord servers are organized into topic-based channels where you can collaborate, share, and just talk about your day without clogging up a group chat. Grab a seat in a voice channel when you're free. Friends in your server can see you're around and instantly pop in to talk without having to call. Get a community of any size running with moderation tools and custom member access. Give members special powers, set up private channels, and more. Low-latency voice and video feels like you're in the same room. Wave hello over video, watch friends stream their games, or gather up and have a drawing session with screen share. Available on Linux, macOS, Windows, iOS, Android, and your web browser. Discord is written in Javascript, React, Elixir, and Rust. The desktop application uses the electron framework. The flatpak version runs in a sandbox to provide better safety and privacy for users. However, this sandboxing prevents the following features from working out of the box: Game Activity, Unrestricted File Access, Rich Presence. Check the README in the Github repo for details. Additional information:Developer: Discord Inc.License: LicenseRef-proprietaryVersion: 0.0.123
- [DDNet](#) (2026/02/03 03:39)
Hardest co-op 2D platformer ever DDraceNetwork (DDNet) is an actively maintained version of DDRace, a Teeworlds modification with a unique cooperative gameplay. Help each other play through custom maps with up to 64 players, compete against the best in international tournaments, design your own maps, or run your own server. The official servers are around the world. All ranks made on official servers are available

worldwide and you can collect points! Additional information:Developer: DDNet TeamLicense: ZlibVersion: 19.7

- [Git Cola](#) (2026/02/03 03:33)
Sleek and powerful Git GUI git-cola is a simple, powerful, and feature-rich GUI for git that provides an easy way to interact with Git repositories. Additional information:Developer: David AguilarLicense: GPL-2.0Version: 4.17.1

- [VNote](#) (2026/02/03 03:15)
A pleasant note-taking platformSimple notes management All plain text, no database Self-contained notebooks, infinite levels of folders, plain notes Tags and attachments Explore and edit external files Your data belongs to you All files on your local disk One notebook is exactly one directory Work from anywhere seamlessly via third-party service of your choice Concentrate on your notes In-place preview or side-by-side live preview Focus on your note in both read and edit mode Pleasant Markdown experience Minimized gap between read and write of Markdown Syntax highlights and in-place preview Effective images management Interactive outline UML diagrams, flowcharts, and math formulas Highly customizable interface Themes and styles Shortcuts and behaviors By programmers, for programmers Vi mode and Vi-like navigation Line number in editor Multiple tabs Window splits Fuzzy search and jump Versatile shortcuts Additional information:Developer: Le TanLicense: LGPL-3.0-onlyVersion: 3.20.1

- [scidCommunity](#) (2026/02/03 02:28)
Community-enhanced chess database and analysis application scidCommunity is a community-driven fork of Scid (Shane's Chess Information Database), focused on adding enhancements while maintaining full compatibility with existing Scid databases. It allows you to store, organize, and search through large collections of chess games with support for any compatible UCI chess engine. Key enhancements in scidCommunity: Engine analysis controls with configurable depth and time limits Integrated TWIC (The Week in Chess) game downloads Direct game uploads to Lichess and Chess.com from the PGN window Tablebase integration via Lichess 7-man endgames Additional theme options (Sand and cobalt2) New feature to open Lichess broadcast tournament games Improved Header Search with saveable search layouts for frequently-used parameters This fork welcomes community suggestions and aims to be responsive to user feature requests. If you've wished for specific functionality in your chess database workflow, scidCommunity may be for you. Additional information:Developer: scidCommunityLicense: GPL-2.0Version: 5.1.2.10

- [ExpressLRS Configurator](#) (2026/02/03 02:25)
Cross platform configuration tool for the ExpressLRS firmware ExpressLRS-Configurator is a cross platform configuration tool for the ExpressLRS firmware. Allowing you to configure your ExpressLRS radio module and bind it to your transmitter. Or just keep them up to date. Additional information:Developer: ExpressLRSLicense: GPL-3.0Version: 1.7.11

- [InterroBot](#) (2026/02/03 02:21)
Website crawler and analyzer InterroBot provides the website crawler, search, and analysis you need to understand your website. It's the perfect tool for managing CMS, improving SEO, or troubleshooting web development. Get a full-featured, 14-day trial for free. InterroBot will continue to run as Community Edition (with a limited set of crawler options) after the trial expires. InterroBot is proprietary software, but free to use and distribute. Web Developers. Search beyond the keywords. InterroBot filters CSS class, JavaScript and image src usage, HTTP headers, errors, download size, response times, and more... CMS Administrators. Settle into a new paradigm—website omniscience. Solve vague end-user reports with InterroBot search. Never miss a reference update again. SEO Specialists. Comprehensive search smokes out HTTP errors, redirection, and keyword coverage issues negatively affecting SERP-standing. Additional information:Developer: Pragmar LLCLicense: LicenseRef-
