- [scidCommunity](#) (2026/02/04 21:10)

Community-enhanced chess database and analysis application scidCommunity is a community-driven fork of Scid (Shane's Chess Information Database), focused on adding enhancements while maintaining full compatibility with existing Scid databases. It allows you to store, organize, and search through large collections of chess games with support for any compatible UCI chess engine. Key enhancements in scidCommunity: Engine analysis controls with configurable depth and time limits Integrated TWIC (The Week in Chess) game downloads Direct game uploads to Lichess and Chess.com from the PGN window Tablebase integration via Lichess 7-man endgames Additional theme options (Sand and cobalt2) New feature to open Lichess broadcast tournament games Improved Header Search with saveable search layouts for frequently-used parameters This fork welcomes community suggestions and aims to be responsive to user feature requests. If you've wished for specific functionality in your chess database workflow, scidCommunity may be for you. Additional information:Developer: scidCommunityLicense: GPL-2.0Version: 5.1.2.17

- [Super Productivity](#) (2026/02/04 20:57)

To-do list and time tracker Super Productivity is a to-do list and time tracking app that helps developers and professionals stay organized and focused. It combines timeboxing, Pomodoro, and Flowtime techniques with seamless integrations of other popular tools. Key Features Task management with to-do lists, projects and tags Timeboxing, Pomodoro and Flowtime support Built-in time tracking with detailed reports Integrations with Jira, GitHub, GitLab, Gitea and OpenProject Calendar sync to manage tasks and events in one place Data backup and synchronization via WebDAV and Dropbox Attach notes, files, and bookmarks to tasks and projects Customizable with a plug-in system Open source and privacy-friendly: no sign-up, no data collection Super Productivity is free and open source software, trusted by thousands of developers worldwide. Additional information:Developer: Johannes MillanLicense: MITVersion: 17.1.0

- [Warzone 2100](#) (2026/02/04 20:53)

Command the forces of The Project in a battle to rebuild the world The classic 3D real-time strategy game from 1999 has been updated, upgraded, and modernized for the very latest platforms! Command the forces of The Project in a battle to rebuild the world after mankind has been nearly destroyed by nuclear missiles. Warzone 2100 offers a story-driven single-player campaign, online multi-player, and single-player skirmish modes. An extensive tech tree with over 400 different technologies, combined with the unit design system, allows for a wide variety of possible units and tactics. Highlights: Remastered single-player campaign with expanding persistent bases, away missions, and more Online multiplayer with up to 10 players, free-for-all or team-play, for massive battles Local skirmish with AI bots, for endless replayability Extensive

tech tree with over 400 different technologies Customizable units with a flexible design system that enables a wide variety of possible tactics Cross-platform multiplayer Support for multiple graphics backends (OpenGL, OpenGL ES, Vulkan) 100% free and open source Additional information:Developer: Warzone 2100 ProjectLicense: GPL-2.0-or-laterVersion: 4.6.3

- [Karere](#) (2026/02/04 20:40)

Chat on WhatsApp Karere brings WhatsApp to your Linux desktop with a native look and feel. It integrates seamlessly with your environment, offering a clean, modern interface that respects your system's theme and workflow. By wrapping WhatsApp Web, it ensures you have access to all the latest features while adding powerful desktop-specific capabilities. Key features include: Native system notifications and tray icon support Persistent login sessions so you don't need to scan the QR code every time Privacy controls and comprehensive spell-checking settings Smooth performance with hardware acceleration Proper clipboard integration for text and images Additional information:Developer: Thiago FernandesLicense: GPL-3.0-or-laterVersion: 2.3.6

- [Wine](#) (2026/02/04 20:22)

Run Windows applications on Linux Wine (originally an acronym for "Wine Is Not an Emulator") is a compatibility layer capable of running Windows applications on several POSIX-compliant operating systems, such as Linux, Mac OSX, and BSD. Instead of simulating internal Windows logic like a virtual machine or emulator, Wine translates Windows API calls into POSIX calls on-the-fly, eliminating the performance and memory penalties of other methods and allowing you to cleanly integrate Windows applications into your desktop. This Flatpak also provides Winetricks. To use it, run: flatpak run --command=winetricks org.winehq.Wine Additional information:Developer: Wine ProjectLicense: LGPL-2.1+Version: 11.0

- [Audok](#) (2026/02/04 19:54)

A free, open source music player Audok is a simple linux folder based music player with streamripper and converter support. Audok is written in python3, the graphical user interface uses gtk3. Audok is a free software under the GPL license. Features: play mp3,wav,flac files youtube-dl support (mp3 downloader) streamripper support record wav files convert wav,ts,flac,mp4 to mp3 Additional information:Developer: KalibariLicense: GPL-3.0Version: 1.0.29

- [Calendar](#) (2026/02/04 19:30)

Manage your schedule GNOME Calendar is an elegant tool to help you plan and stay on top of your schedule for upcoming days and weeks, whether your months are filled with meetings and appointments, public events, travel logistics, or other commitments in your life. Easily create and manage unlimited calendars and events with GNOME Calendar's infinite scrolling month view, week timetable, and scheduling list view. Integrating the latest GNOME technologies and design best practices, GNOME Calendar builds on top of the mature Evolution data server to manage large quantities of events and to provide integration with other applications. You can add calendars from various online calendaring services (like NextCloud, Google Calendar, and CalDAV / WebDAV servers), enabling you to synchronize your events across multiple devices and platforms. GNOME Calendar also supports local and offline calendaring, so you can use it anywhere and anytime while travelling (or after civilization's collapse.) Additional information:Developer: The GNOME ProjectLicense: GPL-3.0-or-laterVersion: 49.1

- [Weather](#) (2026/02/04 19:30)

Show weather conditions and forecast A small application that allows you to monitor the current weather conditions for your city, or anywhere in the world. It provides access to detailed forecasts, up to 7 days, with hourly details for the current and next day, using various internet services.

It also optionally integrates with the GNOME Shell, allowing you to see the current conditions of the most recently searched cities by just typing the name in the Activities Overview. Additional information:Developer: The GNOME ProjectLicense: GPL-2.0-or-laterVersion: 49.0

- [Clocks](#) (2026/02/04 19:29)

Keep track of time A simple and elegant clock application. It includes world clocks, alarms, a stopwatch, and timers. Show the time in different cities around the world Set alarms to wake you up Measure elapsed time with an accurate stopwatch Set timers to properly cook your food Additional information:Developer: The GNOME ProjectLicense: GPL-2.0-or-laterVersion: 49.0

- [Actioneer](#) (2026/02/04 19:03)

Track GitHub Actions runsActioneer lets you browse GitHub repositories, inspect workflow runs, check job logs, and refresh status without leaving your desktop. Key features Browse your GitHub repositories and view Actions workflows and recent runs quickly. Inspect run status (success, failure, queued, in progress) with clear badges and counts. Filter runs and focus on what matters most. View job logs: download and preview run logs for quick troubleshooting. Dispatch workflows, cancel running workflows, and re-run failed runs directly from the app. Favorites and quick search let you focus on the repositories and workflows that matter most. Desktop notifications for run completions and failures so you never miss important results. Keep recent workflow data available offline. Fast refreshes that keep the interface responsive. This package contains the desktop application, icons and AppStream metadata required for distribution via Flatpak/Flathub. See the project repository for source code, contribution guidelines, and additional documentation. Additional information:Developer: Sergey ArmodinLicense: MITVersion: 1.0.3

- [CoreStats](#) (2026/02/04 18:44)

A time related task manager CoreStats is a system statistics viewer. You can monitor the CPU, RAM, Network and Disk IO statistics from here. It is also possible to view the device info and mount or unmount removable devices, view battery statistics and get information about the display. Additional information:Developer: CuboCore GroupLicense: GPL-3.0Version: 5.0.1

- [Manga Reader](#) (2026/02/04 18:43)

Manga Reader for local filesManga reader for local files. Supports zip, rar, tar, 7z, cbz, cbr, cbt, cb7 files and also folders. Images are displayed in a vertical list and their size can be configured (fit width and/or height, user defined max width, original size). Can set up multiple manga folders whose contents will be displayed in a tree view, from where they can be opened. Can bookmark mangas. Configurable keyboard shortcuts. Additional information:Developer: George Florea BănuşLicense: GPL-3.0-or-laterVersion: 2.3.0

- [Brave](#) (2026/02/04 18:04)

Fast Internet, AI, AdblockBrave is on a mission to fix the web by giving users a safer, faster and better browsing experience while growing support for content creators through a new attention-based ecosystem of rewards. Browse faster by blocking ads and trackers that violate your privacy and cost you time and money. Additional information:Developer: Brave SoftwareLicense: MPL-2.0Version: 1.86.148

- [Musicfetch](#) (2026/02/04 18:02)

Download songs and tag themMusicfetch makes the process of downloading and tagging songs from platforms such as YouTube/Soundcloud/Bandcamp easy. You can search for songs, albums or playlists in app or paste a list of URLs to download them. Key Features: Download songs from thousands of sites Information is pre-filled when available Background download while tagging Customize download destination path Supported Tags: Song title Album title Artist Genre Release year Album cover Additional information:Developer: Frieder HannenheimLicense: GPL-3.0-onlyVersion: 1.3.1

- [Switchyard](#) (2026/02/04 17:36)

Rules-based browser launcher Switchyard puts you in control of where links open and what they open. Work links go to Chrome, personal links to Firefox. You decide the rules. Create rules using simple domain, keyword, wildcard, or regex matching. Combine conditions for precise control. Strip tracking parameters or redirect to privacy-friendly alternatives before links even open. Set it once and forget it. Additional information:Developer: Aly RaffaufLicense: GPL-3.0-or-laterVersion: 0.11.4

- [LibreOffice](#) (2026/02/04 17:23)

The LibreOffice productivity suite LibreOffice is a powerful office suite. Its clean interface and feature-rich tools help you unleash your creativity and enhance your productivity. LibreOffice includes several applications that make it the most powerful Free and Open Source office suite on the market: Writer (word processing), Calc (spreadsheets), Impress (presentations), Draw (vector graphics and flowcharts), Base (databases), and Math (formula editing). LibreOffice supports opening and saving into a wide variety of formats, so you can easily share documents with users of other popular office suites without worrying about compatibility. Additional information:Developer: The Document FoundationLicense: MPL-2.0Version: 26.2.0.3

- [indiPDF](#) (2026/02/04 16:59)

A powerful PDF editor for Linux indiPDF is a comprehensive PDF editing application designed specifically for Linux. It provides all the tools you need to view, annotate, edit, and manage PDF documents with a native GTK-styled interface that integrates seamlessly with your desktop.
