- [Jan](#) (2025/11/25 11:39)

Local AI Assistant that runs 100% offline on your device Jan is a ChatGPT-alternative that runs 100% offline on your device. Our goal is to make it easy for anyone to download and run LLMs and use AI with full control and privacy. Features: Local AI Models: Download and run large language models like Llama, Gemma, and Qwen directly from Hugging Face. All models run locally on your device. Cloud Integration: Connect to cloud providers such as OpenAI, Anthropic, Gemini, and Groq when needed. Easily switch between local and cloud models Custom Assistants: Set up specialized AI assistants for different tasks, such as writing, summarizing, or coding. Customize their tone and behavior. OpenAI-Compatible API: Jan includes a local API server (localhost:1337) that works with tools and plugins expecting OpenAI's API format. Model Context Protocol (MCP): Supports MCP to improve context handling and interactions across larger or more complex tasks. Privacy First: Jan runs fully offline by default. Your data never leaves your device unless you enable cloud connections. Additional information: Developer: Menlo Research Pte. Ltd. License: Apache-2.0 Version: 0.7.3

- [Vassal](#) (2025/11/25 06:44)
