- [Sober](#) (2025/03/30 06:40)
Enjoy millions of experiences on RobloxNot affiliated with Roblox. Research project, use at your own risk. Read the notice on our website before using. We ported Roblox to Linux because they wouldn't do it. - keep reading - Enjoy millions of experiences on Roblox, chat with friends, and explore! Seamlessly run Roblox on Linux, faster than on Windows. No emulators. No virtual machines. No cruft. We disable ads and telemetry by default. No strings attached - Sober is a community project. We made it closed source to reduce the potential for abuse (which would lead to Roblox blocking us again) Stays out of the way, powerful when needed. Visit our documentation to see configuration options. Make Sober your own. Turn on server location indicators, bring back the nostalgic oof sound, customize textures, try experimental settings, and more. Additional information:Developer: VinegarHQ & Sober contributorsVersion: 1.0.0
- [Hnefatafl](#) (2025/03/30 05:32)
Play Copenhagen Hnefatafl Client that connects to a Copenhagen Hnefatafl Server. Additional information:Developer: David Lawrence CampbellVersion: 0.13.1
- [XL Converter](#) (2025/03/28 15:54)
Convert imagesXL Converter is an easy-to-use image converter for modern formats. Batch transcode images to JPEG XL, AVIF, WebP, JPEG and PNG. Preserve metadata with ExifTool. Scale down images. QoL features available: drag 'n drop, dark theme, keep directory structure, copy smaller sources, and more. Additional information:Developer: Code PoemsVersion: 1.2.1
- [NetXMS 5.2](#) (2025/03/28 14:05)
Control your network monitoringThis app is a desktop client for accessing NetXMS v5.2.x server. NetXMS is an enterprise grade multi-platform modular open source network management and monitoring system. It provides comprehensive event management, performance monitoring, alerting, reporting and graphing for all layers of IT infrastructure — from network devices to business application layer. Having been designed with flexibility and scalability in mind, NetXMS features a wide range of supported platforms. It is licensed under the GNU General Public License version 2 as published by the Free Software Foundation. Additional information:Developer: Raden Solutions, SIAVersion: 5.2.0
- [ArchiveKeep](#) (2025/03/25 20:08)
Archive files the easy wayDISCLAIMER: This is an early release. The author already uses the software to fulfil own needs, but there's still a room

for improvement and a potential to find undiscovered issues, bugs or edge-cases. Utility facilitating preservation of personal archive of files, replicated in multiple storages of own choice. The main focus is on preservation - keep identical copies while not performing any destructive operations, nor replication of corruption, nor other means of data loss. Features: Plain files - archived files aren't wrapped in custom format, and are readable with any application. Incremental synchronization - update offline and other storages incrementally, when they become available. Filesystem agnostic Additional information:Developer: Miroslav KravecVersion: 0.3.3

- [jdPermissionStoreEdit](#) (2025/03/25 19:30)

Edit the Flatpak Permission StorejdPermissionStoreEdit allows you to directly view and edit the Flatpak Permission Store. This makes debugging easier when you are working with it (e.g. if you are developing an app to manage Flatpak permissions). This program is intended solely for developers and not for regular users. It should only be used by those who know what they are doing. Additional information:Developer: JakobDevVersion: 1.0

- [VacuumTube](#) (2025/03/25 03:48)

YouTube TV interface on the desktopVacuumTube is an unofficial open source "port" of YouTube Leanback (the TV version of YouTube) to the desktop, with a built-in adblocker. It is the best way to experience the TV interface on your computer or Steam Deck. Note: This is not YouTube TV, the YouTube service for streaming television, but rather YouTube for the TV. Additional information:Developer: shyVersion: 1.0.1

- [Field Monitor](#) (2025/03/25 03:45)

Access VMs and external screens Field Monitor is a remote-desktop client designed for the GNOME platform. It is focused on connecting to virtual machines, but can connect to any server supporting the RDP, SPICE or VNC protocols. It has support for directly connecting to VMs of the following hypervisors: Proxmox QEMU/KVM via libvirt For supported VM hypervisors Field Monitor also offers options to manage the basic power state of VMs, such as starting, stopping, rebooting, etc. Additionally, Field Monitor supports opening RDP and Virt Viewer connection files and quickly connecting to RDP, SPICE or VNC servers via URI. Additional information:Developer: Marco KöpckeVersion: 48.0
