Flathub New & Updated Apps

- Feishu (2026/03/25 10:07)
  A collaboration platform Feishu, the advanced enterprise collaboration and management platform - integrating instant communication, calendar, audio/video conferencing, cloud documents, cloud disk, workbench and other functions - accomplishes organizations and individuals, more efficiently and more pleasantly. Additional information:Developer: Feishu Linux TeamLicense: LicenseRef-proprietary=https://www.feishu.cn/termsVersion: 7.58.14
- Nora (2026/03/25 08:24)
  SNS browser Deck view to browse multiple timelines Drag/drop to reorder decks Download fb/ig/x video Multiple profiles with independent cookie storage Additional information:Developer: Nonbili Inc.License: AGPL-3.0-or-laterVersion: 0.1.8
- Ntfyr (2026/03/25 06:37)
  Receive and send ntfy notificationsNtfyr is a native client for ntfy.sh designed for the GNOME Desktop. It allows you to receive notifications from the ntfy.sh service or your own self-hosted ntfy server directly on your desktop. Receive and send notifications via ntfy.sh or self-hosted servers Run in the background to never miss a notification View past notifications with local history support Support for attachments and action buttons Manage subscriptions grouped by server ntfy is a simple HTTP-based pub-sub notification service. It allows you to send notifications to your phone or desktop via scripts from any computer, entirely without signup, cost or 3rd party apps. Additional information:Developer: Thiago FernandesLicense: GPL-3.0-or-laterVersion: 0.5.2
- Szyszka (2026/03/25 05:33)
  Simple but powerful file renamer, written in Rust Szyszka is simple, fast and powerful file renamer, which with help of memory safe Rust Additional information:Developer: Rafał MikrutLicense: MITVersion: 3.0.0
- 4KTUBE (2026/03/25 05:30)
  Download YouTube videos4KTUBE is an application to download videos, playlists and audio from YouTube and other supported platforms. It supports high-quality downloads including HD and 4K formats, along with playlist and batch downloading. Download videos in HD and 4K quality Convert videos to audio formats such as MP3 Download entire playlists and multiple videos Supports subtitles and multiple audio tracks Search and download videos directly within the app Supports multiple languages Additional information:Developer: Warlord SoftwaresLicense: LicenseRef-proprietary=https://raw.githubusercontent.com/rishabh3354/4KTUBE/main/share/license/LICENSEVersion: 2026.03.24
- Resonance (2026/03/25 04:38)
  Test and explore web services Resonance is a local-first, zero-account API client application designed to provide an excellent user experience for testing and interacting with web services. It offers a modern and intuitive interface for developers with powerful features for API development and testing. Key Features: Import collections from OpenAPI 3.0 specifications and Postman collections Environment management with variable templating for different deployment contexts Multiple authentication methods including Bearer tokens, Basic Auth, API keys, OAuth 2.0, and Digest authentication Generate code snippets in 9 languages: cURL, Python, JavaScript (Fetch), JavaScript (Axios), Node.js, Go, PHP, Ruby, and Java GraphQL support with dedicated query editor and syntax highlighting gRPC support for exploring and testing gRPC services Collection runner for batch request execution with variable chaining between requests Built-in mock server for testing without a backend, with custom responses

and configurable delays Workspace tabs for managing multiple concurrent requests with independent state Request history with search and replay capability for easy debugging Performance metrics showing detailed timing breakdown including DNS, TCP, TLS, and download times Cookie management with full attribute display HTTP proxy support with authentication and bypass lists Protocol version control supporting HTTP/1.1, HTTP/2, and HTTP/3 Comprehensive keyboard shortcuts for efficient workflow Four theme options: light, dark, system-adaptive, and black (OLED) Available in English, German, Spanish, French, and Italian Additional information:Developer: Dennis BlümerLicense: MITVersion: 2.7.1

- [ParaView](#) (2026/03/25 03:50)
  Data analysis and visualization ParaView is an open-source, multi-platform data analysis and visualization application. ParaView users can quickly build visualizations to analyze their data using qualitative and quantitative techniques. The data exploration can be done interactively in 3D or programmatically using ParaView's batch processing capabilities. ParaView was developed to analyze extremely large datasets using distributed memory computing resources. It can be run on supercomputers to analyze datasets of exascale size as well as on laptops for smaller data. Additional information:Developer: Kitware Inc.License: BSD-3-ClauseVersion: 6.0.1

- [QOwnNotes](#) (2026/03/25 02:21)
  Markdown note-takingQOwnNotes is the open source (GPL) plain-text file notepad with Markdown support and todo list manager for GNU/Linux, Mac OS X and Windows by Patrizio Bekerle, that (optionally) works together with the notes application of ownCloud or Nextcloud. Additional information:Developer: Patrizio BekerleLicense: GPL-2.0+Version: 26.3.20

- [Minecraft: Pi Edition: Reborn](#) (2026/03/25 01:27)
  Fun with BlocksMinecraft: Pi Edition Modding Project. NOTE: This is not verified by, affiliated with, or supported by Mojang or Microsoft. Additional information:Developer: TheBrokenRail & Mojang ABLicense: LicenseRef-proprietaryVersion: 3.0.2

- [Sober](#) (2026/03/25 00:10)
  Play, chat & explore on RobloxNot affiliated with Roblox. Research project, use at your own risk. Read the notice on our website before using. We ported Roblox to Linux because they wouldn't. Enjoy millions of experiences on Roblox, chat with friends, and explore! Seamlessly run Roblox on Linux, faster than on Windows. No emulators. No virtual machines. No cruft. We disable ads and telemetry by default. No strings attached - Sober is a community project. We made it closed source to reduce the potential for abuse (which would lead to Roblox blocking us again) Make Sober your own. See our documentation for a list of options. Turn on server location indicators, bring back the nostalgic oof sound, customize textures, try experimental settings, and more. Additional information:Developer: VinegarHQ & Sober contributorsLicense: LicenseRef-proprietary=https://sober.vinegarhq.org/notice.txtVersion: 1.6.7

- [Web](#) (2026/03/24 23:42)
  Browse the web The web browser for GNOME, featuring tight integration with the desktop and a simple and intuitive user interface that allows you to focus on your web pages. If you're looking for a simple, clean, beautiful view of the web, this is the browser for you. Web is often referred to by its code name, Epiphany. Additional information:Developer: The GNOME ProjectLicense: GPL-3.0+Version: 50.3

- [Rayforge](#) (2026/03/24 23:40)
  A desktop application for laser cutting and engraving Rayforge is a desktop application for laser cutting and engraving. It provides an intuitive interface to create and manage laser cutting projects. Rayforge support communicating with GRBL based laser cutters. Rayforge supports

importing SVG, DXF, PDF, and PNGs, and provides advanced features such as multi step jobs, automatic path optimization, interpolation based on laser dot size, and much more. Additional information:Developer: Samuel AbelsLicense: MITVersion: 1.3.2

- [RustConn](#) (2026/03/24 23:17)
  Manage remote connections easily RustConn is a modern connection manager for Linux with a GTK4/Wayland-native interface. Manage SSH, RDP, VNC, SPICE, MOSH, Telnet, Serial, Kubernetes, and Zero Trust connections from a single application. Core protocols use embedded Rust implementations with no external dependencies required. Organize connections into groups and tags, split terminals side by side, automate tasks with expect scripts and command snippets, and import from Remmina, Asbru-CM, MobaXterm, Royal TS, SSH config, or Ansible inventory. SSH, MOSH, Telnet, Serial, and Kubernetes with embedded VTE terminals RDP via IronRDP, VNC via vnc-rs, and SPICE via spice-client with external fallback Zero Trust tunnels: AWS SSM, GCP IAP, Azure Bastion, Cloudflare, Teleport, Tailscale Credential storage via KeePassXC, GNOME Keyring, Bitwarden, 1Password, or Passbolt Split view, cluster commands, session logging, and Wake-on-LAN Additional information:Developer: Anton IsaievLicense: GPL-3.0-or-laterVersion: 0.10.6

- [Short Circuit](#) (2026/03/24 22:27)
  Developer scratchpadShort Circuit is a developer scratchpad made for GNOME! The next time you copy paste some text to do some text manipulation like base64 encode/decode, json formatting etc.. You can just copy paste in shortcircuit and control T your way through everything! Additional information:Developer: Bharat KalluriLicense: GPL-3.0+Version: 0.2

- [Discover Overlay](#) (2026/03/24 22:08)
  A graphical overlay for Discord voice chat.A graphical overlay for Discord voice chat. Additional information:Developer: triggLicense: GPL-3.0-or-laterVersion: 0.7.9

- [FingerGo](#) (2026/03/24 21:34)
  Visual touch-typing trainer FingerGo is a cross-platform touch-typing trainer designed to improve typing speed and accuracy with a user-friendly and intuitive interface. It includes real-time keyboard visualization, a hierarchical text and code library, and live statistics tracking. Features: Clean Interface Design Shortcuts, Zen Mode, keyboard/Stat Toggle Real-time visual keyboard with finger mapping Hierarchical text/code library (plain text and code samples) Live stats: WPM, CPM, accuracy, per-key mistakes, session history Eye-friendly Dark/Light themes Customizable color theme Multiple keyboard layouts: QWERTY, Dvorak, JCUKEN, QWERTZ Additional information:Developer: Asher BukLicense: Apache-2.0Version: 1.2.4

- [reManager](#) (2026/03/24 21:15)
  Manage mods on reMarkable tabletsA multi-platform desktop app for managing mods on reMarkable tablets. Powered by the Vellum package manager. Features: Multi-Device Management: Save multiple sets of SSH credentials with password or key-based authentication Package Management: Browse, install, upgrade, and uninstall packages with automatic dependency resolution Maintenance Tools: Enable/disable auto-updates, set timezone, run package-provided scripts Interactive Terminal: Access a complete shell session on your reMarkable File Browser: Browse filesystem, transfer files to and from your reMarkable Backup and Restore: Backup and restore document library and configuration Configuration Editor: Edit system configuration files with syntax highlighting Additional information:Developer: Mitchell ScottLicense: GPL-3.0-or-laterVersion: 1.2.2

- [Google Chrome (unstable)](#) (2026/03/24 20:53)

The browser built to be yours**NOTE: This wrapper is not verified by, affiliated with, or supported by Google.** Google Chrome is a browser that combines a minimal design with sophisticated technology to make the web faster, safer, and easier. Additional information:Developer: GoogleLicense: LicenseRef-proprietaryVersion: 148.0.7743.0-1

- QPrompt (2026/03/24 20:34)
  Personal teleprompter software for all video creatorsOpen source personal teleprompter software for all video creators. Built with ease of use, control accuracy, fast performance, and cross-platform support in mind. QPrompt's convergent user interface can run on Linux, Windows, macOS, and Android. Additional information:Developer: Javier O. Cordero PérezLicense: GPL-3.0Version: 2.0.0
- 99Managers Futsal (2026/03/24 20:28)
  Futsal team-management game.Manage a futsal team and lead it to success by scouting players and choosing the best tactic and line up for every match. Customize teams and players with the in-game editor. Proudly open source. Made with Godot Engine 4 and much love. Additional information:Developer: Simon DalvaiLicense: AGPL-3.0-or-laterVersion: 0.7.1
- Keep me Awake (2026/03/24 20:18)
  Inhibit lock screen and suspendInhibit lock screen and suspend of your desktop system, via the main user interface or via global shortcuts. Additional information:Developer: Sebastian WiesnerLicense: EUPL-1.2Version: 2.1.0
- MusicBrainz Picard (2026/03/24 20:06)
  MusicBrainz's music tagger Do you need to clean up your music library? Picard is an open-source cross-platform music tagger by MusicBrainz. It has the ability to identify audio files even without any existing metadata. Picard helps you organize your music collection by renaming your music files and sorting them into a folder structure exactly the way you want it. A variety of plugins are available and you can even write your own. Picard supports a wide range of audio formats and can also lookup an entire CD for you. Tagging audio files has never been easier. Features: Multiple formats: Picard supports all popular music formats, including MP3, FLAC, OGG, M4A, WMA, WAV, and more. AcoustID: Picard uses AcoustID audio fingerprints, allowing files to be identified by the actual music, even if they have no metadata. Comprehensive database: Picard uses the open and community-maintained MusicBrainz database to provide accurate information about millions of music releases. CD lookups: Picard can lookup entire music CDs with a click. Plugin support: If you need a particular feature, you can choose from a selection of available plugins or write your own. Scripting: A flexible but easy to learn scripting language allows you to exactly specify how your music files will be named and how the tags will look like. Cover Art: Picard can find and download the correct cover art for your albums. Open Source: Picard is licensed under the GNU General Public License 2.0 or later, and is hosted on GitHub where it is actively developed by some awesome developers. Additional information:Developer: MetaBrainz FoundationLicense: GPL-2.0-or-laterVersion: 2.13.3
- Pyfa (2026/03/24 19:45)
