- [OpenWrt](#) (2025/11/09 10:38)
OpenWrt (from open wireless router) is an open-source project for embedded operating systems based on Linux, primarily used on embedded devices to route network traffic. The main components are Linux, util-linux, musl, and BusyBox. All components have been optimized to be small enough to fit into the limited storage and memory available in home routers.
- [openDesk](#) (2025/11/08 15:28)
openDesk is the customisable office and collaboration suite designed specifically for your needs in public administration.
- [FreeSewing](#) (2025/11/07 10:19)
What is FreeSewing? FreeSewing is open source software to generate bespoke sewing patterns, loved by home sewers and fashion entrepreneurs alike. Industry sizing is a bunch of lies. Join the slow fashion revolution and enjoy clothes that fit you.
- [Zulip](#) (2025/11/06 12:55)
Zulip is an open source chat and collaborative software created by Jeff Arnold, Waseem Daher, Jessica McKellar, and Tim Abbott in 2012. Today, it is one of the free and open source alternatives to Slack, with over 60,000 commits contributed by over 1000 people.
- [Loops](#) (2025/11/05 09:50)
Loops was born from a simple belief: every moment has the power to inspire, connect, and create change. In a world where attention is precious and time is fleeting, we recognized the need for a platform that celebrates the art of concise storytelling. We're not just building a platform; we're nurturing a movement. A movement that values authenticity over perfection, creativity over conformity, and community over competition. Every feature we develop, every update we release, and every decision we make is guided by our commitment to empowering creators and connecting communities worldwide.
- [openCode](#) (2025/11/04 12:58)
openCode brings open source to the German public sector. Together, we develop and share our software that shapes our digital future in a self-determined way.
- [TrueNAS OS CE](#) (2025/10/14 22:41)
Powerful, Flexible, and Free. TrueNAS Community Edition delivers next-generation unified storage with lightning-fast app deployment, robust Docker support, and enhanced cloud and data migration features, all built on OpenZFS. TrueNAS, built on the legendary ZFS filesystem, delivers unmatched data protection with features like snapshots, replication, and RAID-Z, making it the trusted choice for businesses and individuals alike. As the world's most popular storage OS, TrueNAS is the only universal and unified data platform, empowering you to scale with file, block, or object storage alongside integrated container and VM support.
- [Equis](#) (2025/10/14 08:32)
EQUIS (IPA: /lkwi/) is a 8 Channel DJ/Performance Mixer for Linux & JACK.
- [Official Linux Wireless documentation](#) (2025/10/13 08:59)

This is the main source of Documentation for the Linux wireless (IEEE-802.11) subsystem. This wiki features information for end-users, developers and vendors. This site covers all the new 802.11 drivers, the new core mac80211 and cfg80211 components along with the new userspace and in-kernel nl80211 configuration interface. New nl80211 userspace applications are also documented.
