## The Elephant in the Room

The Elephant in the Room is about a 'mysterious' force that makes people behave badly (cheat, steal, lie, pollute, waste, become greedy, and so forth). We can experience its effects on people from all around the world, yet many seem to not recognize "it" as a problem, or they are not even aware of "it". Like a fish in the water that is being pushed by the water current, people on this planet are pushed by this mysterious force. And that force is "trade". Our world-wide society pushes people into a constant trade with each other, and that creates an imbalance of power. An imbalance that will destroy our species if left alone. Let's meet this force, understand it, accept it and fight against it. This video series is managed by Aaron.

## TROM VideoBooks

We create documentaries out of our eBooks. These documentaries are entirely based on the books themselves but they may differ here and there in terms of the script and overall presentation, but in general they are the same as the books. All sources for all of our videos are greatly detailed/sourced in the books they are based upon. These videos are also available without the narration voice so anyone can dub them into any language. See here about how you can do it.

## Voices

TROM Voices is all about highlighting interesting minds from all around the world by video editing their mindful words. Jacque Fresco, Carl Sagan,

Richard Feynman, or any other human with interesting ideas could be part of this series.

## TROM-Cast

Our (almost) weekly video podcast where we discuss one main subject each week + answer questions from people and discuss the most interesting TROM Curated News of the week. The interesting part is that we allow anyone to participate in our cast via Jitsi Meet (a trade-free application), plus anyone can suggest topics for the next casts. So, embark into hours of live-streams about topics like automation, science, religion, trade, behavior, and what not. We also have an audio version of the cast, here. And here you can find all of the Show Notes.

## TROM Documentary

The TROM documentary is trying to present, in a simplistic way, the world in which we, human beings, live. We try to present the world that was discovered so far through the lenses of science: from the evolution of everything (including us) to the monetary system (the game we currently play), to a different kind of world that we could build for the benefit of us all, then back to Earth. We are trying to present alternative solutions to current problems and take into account the future, which promises to be more than interesting. An informative documentary, perhaps shocking and disturbing

to many, depending on how you digest the information. The documentary is divided into chapters and sub-chapters due to the documentary's excessive length (14 hours) and all the parts are connected so we recommend that you see them in order.
