Improves the system performance

TROM-Jaro makes your system faster, more durable, more reliable, more powerful, eliminate drawbacks, leaves a larger capacity for memory and storage, makes everything look more accurate.

TROM-Jaro does not get slower day after day like other operating systems that require defragmenting for your hard drive.

Let your old computer have a second life, as TROM-Jaro also runs perfectly well on older hardware, on which other operating systems would probably even refuse to install, or leave you waiting for 20 seconds after each click.
