Reduces user burden

TROM-Jaro automates tasks, provides better psychological and emotional appeal, it can be configured for self cleaning or self-repairing, it is quieter.

TROM-Jaro is also friendly to the environment, as it can be installed on USB sticks and one DVD can be legally used for installation on as many computers as you want; there are no boxes and no amount of plastic or paper is involved.

Also, forget about software drivers: very fast and standalone installation process, out-of-the-box ready peripherals (in most of the cases), less harm for the environment (because there is no need for all these CDs or DVDs that come with hardware any more).
