Makes everything simpler

Using these approaches: simplify, remove complexity, make more elegant (surprisingly simple yet surprisingly effective).

You can try TROM-Jaro without touching your current operating system (using a “Live DVD” or a “Live USB”, even in a Virtual Machine).

You can, of course, install TROM-Jaro on the newest computers and laptops and still keep your other operating system(s) with dual-boot, using EFI partitions.

Are your tired of restarting your computer all the time? Use TROM-Jaro to update your operating system AND all your software with a single click. After most of the TROM-Jaro updates you can keep your system running without a restart.
